

## Germantown Community Theatre

Constructed as one of the original school houses in 1903 and converted into a community theatre, GCT is about to receive a much needed \$1.5 million dollar restoration and addition.

The Salvaggio Group has been selected as the General Contractor to renovate the original theatre and add on 6,000 square feet designed by WalkerArch.

The two-story addition will include offices, multiple open work spaces, Green room and educational spaces. The original structure will be completely renovated to include a new box office, lobby and bathrooms.

This renovation is just another example of The Salvaggio Group being a community leader in preservation of historic structures in Germantown.

**Please consider a donation to GCT for this wonderful restoration. Email: [exec@gctcomeplay.org](mailto:exec@gctcomeplay.org) to make a donation today.**
